

WHERE DO YOU FIND AN **AWARD-WINNING** LEVEL OF COMMITMENT TO LAB AND FIELD EXCELLENCE?

Chicago Testing Laboratory, Inc. **WITHOUT A DOUBT**

This Illinois State Toll Highway Authority 2006 award-winning project is a great example of how our commitment to delivering the best for each and every project produces outstanding results. We worked with contractors and subcontractors on this award-winning pavement project to provide technical expertise, including:

- Field site density testing and control—HMA
- Plant site laboratory testing and control—HMA
- Profilograph operation and smoothness oversight
- Quality control management
- Design and/or verification of project mixes—HMA
- IMIRS materials data entry—HMA

This project included three specialty sections with Rubber Modified Asphalt in a standard IL N105 mixture, a Stone Matrix Asphalt (SMA) mixture and an Open Graded Friction Course (OGFC) mixture. Chicago Testing Laboratory was instrumental in the success of each of these innovative products and in the production of the award-winning pavement.

I-294 – Illinois State Toll Highway Authority	
Client	Illinois State Toll Highway Authority
Prime Contractors	Central Blacktop Gallagher Asphalt
Task	Quality Control Testing
Scale	\$12 Million
Subcontractors	Sanchez Paving Metromix

You can't predict the future—but our past performance should provide more than ample assurance of why we are the people you can rely on **WITHOUT A DOUBT**. Since 1912, the name **Chicago Testing Laboratory** has been synonymous with the word trust.
